Features		Description	Cywareness	IronScales
Training Modules				
Video Library		Access hundreds of expert-curated videos covering diverse cyber awareness topics, with series tailored to different organizational needs. Authored by leading cyber experts, our videos feature up-to-date content and a modern design.	✓	✓
Multilingual Video Experience	Dubbing	Enhance learning with Video Language Localization. Subtitles available in 54 languages, dubbing in 8. Choose your language preference for tailored training. Admin-launched campaigns match recipient's default office language.	✓	✗
	Subtitles			✓
Global Timing Personalization		Launch international campaigns effortlessly with Videos Time Localization. Set campaign times according to the recipient's default office language.	✓	✗
Interactive Learning Quizzes		Enhance learning outcomes with Quizzes Library. Each video comes with a matching quiz, providing immediate feedback to the recipient and detailed performance insights on the campaign dashboard for the admin.	✓	✓
Organization - Custom Content		Empower administrators with one stop shop education library. Upload organization-custom content to the Cywareness library, complete with auto-generated subtitles in any language. Track recipient interactions through the comprehensive campaign dashboard.	✓	✗
Game Library		Dive into our cybersecurity game library for immersive training and education. Developed by experts, our games offer interactive scenarios and challenges to enhance awareness and skills in a captivating way.	✓	✗
Simulations				
Simulation Library		Experience a wide array of phishing simulations through the Simulation Library. With just three clicks, launch diverse simulations exploiting various attack vectors, including SMS, Email, and on WhatsApp.	✓	✗
Comprehensive Simulation	Message Component	The message sent to the recipient, enticing them to click the call-to-action link or button embedded within the message.	✓	✗
	Landing Page Component	A lifelike landing page that deliberately blurs the distinction between the genuine and the deceptive. Recipients will be prompted to submit their information on this page.	✓	✗
	MicroTraining Component	Recipients who engage with the call-to-action button, link, or submit their credentials will be provided with guided tours that offer strategies to avoid falling into phishing traps.	✓	✓
Attack Vectors	Email Attack Vector: Inbox Phishing	Initiate a simulation by delivering it directly to the recipient's mailbox.	✓	✓
	SMS Attack Vector: Text Message Tactic	Execute a simulation by sending it to the recipient's phone as an SMS.	✓	✓
	WhatsApp Attack Vector: Chat Deception	Launch a simulation by sending it to the recipient's phone as a WhatsApp message.	✓	✗
USB DropAttack: Physical Media Intrusion		Simulate a DropAttack by placing removable media in a random location within the organization's workspace. Identify the individual who plugs it in, provide immediate feedback, and take over their computer screen for an educational module.	✓	✗

Simulations				
AI-Powered Simulation Builder		Craft tailored phishing simulations effortlessly with the AI Simulation Builder, a world-first. No coding skills required, just text-based inputs for unlimited simulation possibilities.	✓	✗
Liquid Simulation Builder		For HTML-savvy admins, the Liquid Simulation Builder offers a platform to craft personalized simulations, providing a dynamic and engaging learning environment.	✓	✗
Personalized Simulation Greetings		Welcome recipients with a personal touch using Simulation Personalization. Each campaign starts with a customized greeting, fostering a more relatable and impactful training experience.	✓	✓
Global Timing Personalization		Effortlessly launch simulations worldwide with Simulation Time Localization. Ensure optimal engagement by aligning launch times with recipients' time zones.	✓	✗
Insights				
Organization Dashboard		Gain a holistic view of organizational progress through the Organization Dashboard. Track group and office performance, upcoming campaigns, and overall Awareness Scores.	✓	✓
Real-Time Campaigns Dashboard Monitoring		Monitor any campaign progress in real-time with the Campaign Dashboard. Dive deep into recipient interactions, analyzing data per member, group, or office.	✓	✗
Automated Performance Reports	For Video	Receive detailed PDF Performance Reports after each campaign. These reports are automatically generated, available for download, and emailed to the admin, offering deep insights into organizational performance.	✓	✗
	For Video & Quiz		✓	✗
	For Simulation		✓	✓
Comprehensive Profiles	Member Profile:	The member profile includes email, phone, groups, office, awareness scores, campaign history, reported incidents, and segment engagement scores.	✓	✗
	Group Profile:	The group profile offers office assignments, member lists with awareness scores, and group awareness tracking over time.	✓	✓
	Office Profile:	Discover office dynamics with insights into assigned groups, members, and their awareness scores. Track office awareness scores and performance trends over time.	✓	✗
Active Directory & Integrations				
Effortless Recipient Management		Simplify recipient management with Cywareness Active Directory. Manage members, groups, and offices effortlessly through a user-friendly interface.	✓	✓
Active Directory On-Premise Integration		Keep your Cywareness platform updated with Active Directory On-Premise Integration. Update member details manually or automatically every 24 hours.	✓	✓
Active Directory Azure Integration		Manually update organization recipients with Active Directory Azure Integration, ensuring seamless data synchronization with the Cywareness platform.	✓	✗
ClickGuard Phishing Reporting Plugin & Console		Empower members with Cywareness Report Plugin for Microsoft Exchange and Google G Suite. Report, investigate, and get immediate admin feedback.	✓	✓
Unverified Domain Campaigns		Broaden your cyber security awareness campaigns with the ability to reach beyond verified domains, ensuring comprehensive coverage across your organization.	✓	✗
